

TradingView Setup Guide

Fixed Range Volume Profile on your 1-minute chart in under 5 minutes.

WHAT YOU NEED

- + TradingView Essential plan (or higher) — FRVP requires a paid plan
- + CME futures data (via TradingView subscription or broker integration)
- + 1-minute chart on ES1! or NQ1! loading with live data

FRVP SETTINGS

Row Size

Number of Rows = 1000

Default is 24-100. Not enough. 1000 gives you precise POC, VAH, VAL placement.

Value Area

70%

Standard. 70% of session volume defines the value area. Don't change this.

Histogram

Total volume, single color, 30-50% opacity

No red/green split. One neutral color. The profile is a reference, not the main event.

POC Line

ON — Red

Your anchor. Highest volume price. Must stand out immediately.

VAH / VAL Lines

ON — White or Yellow

Upper and lower value boundaries. Same color — they're paired.

THE 3 PROFILES TO DRAW EVERY MORNING

- 01** PRIOR DAY RTH
9:30 AM - 4:00 PM ET (all instruments) | Mark PD-POC, PD-VAH, PD-VAL
- 02** OVERNIGHT
18:00 - 09:29 ET | Mark OVAH, OVAL, OPOC
- 03** WEEKLY COMPOSITE
Sunday 18:00 - Friday 16:59 | Mark PWVAH, PWVAL, PWPOC

RIGHT-CLICK FRVP > SETTINGS > SAVE AS DEFAULT

Your chart is set. The VolumeEdge course teaches you how to read it.
